

Doris Hauser

Head of Sustainability Research

Prior to her present engagement, Doris Hauser was Founder and Managing Director of Eco Project Hauser, an advisory company in the area of value-oriented corporate management and corporate social responsibility. Previously she worked as an ethics analyst at Dr. Hoeller Asset Management and Investment Advisory and as Project Engineer at the Institute for Product Design, Development and Construction at the University of Applied Sciences, Rapperswil. Between 1986 and 2000 she gathered a wide range of experience as a development engineer and project manager at a number of industrial companies as well as in the area of eco-design and educational software development. Doris Hauser holds a degree in electrical engineering from the University of Applied Sciences, Rapperswil and a postgraduate degree in environmental technology.

«What fascinates me about Forma Futura is the interconnection between the financial world and issues dedicated to fostering a sustainable quality of life.»
